## Appendix B

The data tables for individual hospitals found in Appendix B provide the number of inpatient discharges, the number of outpatient visits, and the number of procedures performed by each hospital. This data is provided for the purpose of comparison of how many individuals seek medical services and how many surgical procedures are performed by each hospital in relation to the number of reported events. This data is required to be reported to the Indiana State Department of Health by hospitals no later than 120 days after the end of each calendar quarter. The Indiana Hospital & Health Association is the contractor that collects the data from each hospital. They perform quality checks and report the data to the Indiana State Department of Health in a standardized format. Appendix B reflects the data reported for the calendar year 2007 by hospitals as of August 15, 2008.

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2007. The report was sent in late June 2008. Facilities were instructed to review their data for correctness and completeness. Facilities then returned to the ISDH a verification of data. In July 2008, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. A few facilities failed to return the verification prior to the publishing of the report. The report for each facility reflects whether the data was verified by the facility.

## Appendix C

As a way of providing some comparative figures for ambulatory surgery centers and the reported events, the reports for individual ambulatory surgery centers found in Appendix C provide the number of procedures performed by each ambulatory surgery center. This data is provided in this report for the purpose of comparison of how many patients are treated and how many procedures are performed by each ambulatory surgery centers in relation to the number of errors reported. This data is required to be reported to the Indiana State Department of Health. Appendix C reflects the surgical procedures performed as reported by ambulatory surgery centers for the year 2007.

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2007. The report was sent in late June 2008. Facilities were instructed to review their data for correctness and completeness. Facilities then returned to the ISDH a verification of data. In July 2008, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. A few facilities failed to return the verification prior to the publishing of the report. The report for each facility reflects whether the data was verified by the facility.

## APPENDIX D

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2007. The report was sent in late June 2008. Facilities were instructed to review their data for correctness and completeness. Facilities then returned to the ISDH a verification of data. In July 2008, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. A few facilities failed to return the verification prior to the publishing of the report. The report for each facility reflects whether the data was verified by the facility.
